

High Bills – Energy Wise

-
- El Paso Electric recommends that customers review their energy usage shown on their bill for this time last year to think about what can be done differently this summer to lower their energy usage
- Spikes in energy bills correlate with hot weather because the harder air conditioning systems work to make homes comfortable, the more energy is needed
- Customers' electric bills are directly impacted by the amount of energy they use during their billing cycle, meaning the more energy they consume the higher their bill will be
- El Paso Electric is consistently sharing energy saving tips with customers to help them lower their usage and bills, follow us on social media (Facebook, Instagram, Twitter) or visit epelectric.com
- Any measure taken by a customer to implement energy efficiency and energy conservation measures can help them reduce their energy usage and their bill, especially when the temperatures in our region rise during the summer season
